OBJECTIVE

I am a **Full Stack Web Developer** with a love for technology with emphasis on end-to-end solutions. I pride myself on being able to deliver quality products that solve business problems. Being a self-starter, I can work individually or collaborate effectively in a team environment.

WORK EXPERIENCE

AIG, Full Stack Web Developer

07/2018 – Present

- Used HTML5, Bootstrap4, CSS, Sass, jQuery, and JavaScript to build responsive web applications.
- Developed back-end using Python and Flask framework.
- Managed CRUD operations with SQL database.
- Utilized Chrome DEV tools and Inspect/Console for debugging.
- Implemented User Authentication and Authorization with Okta using OpenID Connect.
- Integrated custom web app with ServiceNow APIs and Splunk APIs.
- Utilized Visual Studio Code and Git repositories.

Parker Hannifin, Industrial Engineer

09/2017 – 05/2018

- Automate 1+ million rows of data extraction from ServiceNow using ServiceNow REST API to get real-time data comparing to 24-hour old data with old tool.
- Develop Excel macros to clean and transform raw data for loading into QlikView dashboard.
- Create clean and interactive dashboard to help business users quickly discover insights from data and make informed data driven decisions.
- Attend meetings with stakeholder to gather & analyze requirements.
- Create technical documentation of the project for knowledge transfer and user manual.
- Other Duties
- Automate 10 daily, weekly and monthly reports generated internally, that resulted in 70% reduction in time spent preparing reports, increasing overall team productivity.

Parker Hannifin, Industrial Engineer Intern

11/2016 – 09/2017
