OBJECTIVE

I am a **Full-stack Web Developer** with a love for technology with emphasis on end-to-end solutions. I pride myself on being able to deliver quality products that solve business problems. Being a self-starter, I can work individually or collaborate effectively in a team environment.

WORK EXPERIENCE

AIG, Full Stack Web Developer

01/2019 – Present

- Used HTML5, Bootstrap4, CSS, Sass, jQuery, and JavaScript to build responsive web applications.
- Developed back-end using Python and Flask framework.
- Managed CRUD operations with PostgreSQL database.
- Utilized Chrome DEV tools and Inspect/Console for debugging.
- Implemented User Authentication and Authorization with Okta using OpenID Connect.
- Created custom REST APIs and integrated web app with APIs from services like ServiceNow, Splunk.
- Tools: Visual Studio Code, Git and GitHub, Apache web server.

AIG, Qlikview Developer

07/2018 – 01/2019

- Automated 1+ million rows of data extraction from ServiceNow using ServiceNow REST API to get real-time data comparing to 24-hour old data with old tool.
- Automated 10 daily, weekly and monthly reports generated internally, that resulted in 70% reduction in time spent preparing reports, increasing overall team productivity.
- Created clean and interactive dashboard to help business users quickly discover insights from data and make informed data driven decisions.

Parker Hannifin, Industrial Engineer

09/2017 – 05/2018

- Led a cross-functional team to create a user-friendly interface using Visual Basics to automate manufacturing process with 300+ parts and 1000+ combinations.
- Attended meetings with stakeholder to gather & analyze requirements.
- Created technical documentation of the project for knowledge transfer and user manual.

Parker Hannifin, Industrial Engineer Intern

11/2016 – 09/2017
